

Oil-Based Flexographic Ink Flexographic FA Ink

It is oil-based flexographic ink for polyolefin films.

■ Features

- ▶ It can be used for high-speed printing.
- ▶ Excellent printability.
- ▶ Ideal for process printing.
- ▶ Its ink-film excels in physical properties.
- ▶ Excels in resistance to oil and heat.

■ Applications

- ▶ Treated polyethylene and its composite films
Treated polypropylene

■ Handling Instructions

- ▶ Use FA solvents for diluents.
- ▶ Although printing viscosity depends on the printing speed it is best to use 12 to 16 seconds for white ink and 12 to 18 seconds for color inks. (Zahn Cup No.3, 25°C)

■ Attention

- ▶ Do not use untreated polyethylene films.

- ▶ The data contained herein are based on the results of the tests conducted in accordance with the in-house test methods, and are not standard values. Always conduct pre-use tests to ascertain the suitability of the product to your requirements. Nothing contained herein is to be construed as a recommendation for use in violation of any patents, applicable laws or regulations. It is the responsibility of the user to comply in all respects with applicable laws and regulations.
- ▶ Owing to product improvement the information contained herein may be modified without any prior notice.
- ▶ Make sure to read MSDS thoroughly before using the product.
