

Additives

UV DG Reducer

"UV DG Reducer" is a diluent for UV inks. Besides general UV inks, it is useable for most UV inks like special UV inks, UV hybrid inks, and so forth.

■ Features

- ▶ Highly effective diluent.
- ▶ Effective in small quantity. (Adding 2% reduces tack value by approximately 1.)
- ▶ Improves ink flow.
- ▶ Softens inks appearance.
- ▶ Applicable to both, offset as well as letterpress, printings.
- ▶ Does not affect adhesion of UV ink.
- ▶ Useable with almost all our UV ink products.

■ Handling Instructions

- ▶ When mixing with UV inks, use ink spatula to stir and mix well.
- ▶ "UV DG Reducer" does not contain liquid photoreactive initiator. It may affect ink's curing or drying property when added in large quantity. Add only within 5%.
- ▶ Adding a large quantity can cause scumming in offset printing.
- ▶ In some cases, it may not be useable for inks like "UV OL SD". For detailed information, either refer to individual product's pamphlet or contact nearest Sales Office.
